After several months of talking and making memes about awtokism, the time has come for me to really explain what awtokism is, even though most of you (mythicals) have an idea of what awtokism is and what it is about, Most of you who know about awtokism cannot explain very well what awtokism is about or even write and talk about awtokism.

Awtokism, which can be referred to as anti-mythicalism, anti-otherkinism and anti-nonhumanism, is a political ideology that is characterized by defending discrimination, oppression and the persecution of mythics (otherkins / non-humans) in the media and in culture , mainly in the mass media and in video games, and it can also be used to refer to anti-mythical behaviors (anti-otherkins / anti-non-humans) and also the simple discrimination against myths by humans and, in some cases, by others mythical.

As a political ideology, awtokism is characterized by not having precisely political parties, but rather corporations and / or governmental or religious organizations that are responsible for discrimination, oppression and persecution of myths, with the incentive for humans to attack the myths (or even the myths themselves). attack other mythics) individually, and sometimes collectively. The economy of awtokismo is normally neoliberal, having an awtokista government with a totally neoliberal country, but there may be the presence of a state capitalism or an economy directed in case the persecution to the mythicals is at an advanced level.

To have an awtokist government, it is enough to have only one awtokist minister / secretary in the government to start the deployment of awtokism in politics, thus being able to generate the evolution of awtokism for the creation of awtokist governmental organizations and also being able to create awtokist militias to persecute the myths, militias may have so much support or even be created by the government or by the corporations themselves.

The term awtokismo, comes from AWTOK (which means Always Watching The Otherkin / kind), which is a supposed organization that hunts and chases myths, but after a while, the term AWTOK it started to be used for any type of organization that hunts, chases or even promotes hunting and persecution to myths.

Awtokism can also be understood as a form of human fascism against myths, since the characteristics between fascism and awtokism are very similar, mainly in the matter of preaching persecution to certain groups considered as threats, which in the case of awtokism, they are the myths, and the creation of armed groups or even virtual militias to fight these groups, which in the case of awtokismo, are individuals focused on persecuting the mythicals, there may be groups to persecute the mythicals, and also virtual militias to fight the mythicals .

Some of the main aspects of awtokismo that we can mention here are, davidjaffism (awtokism against divinekins / godkins), hidekikamiyaism / kamiyaism (awtokism against angelkins and demonkins), johncarmackism (awtokism against demonkins) and georgebroussardism (awtokism against alienkins), also has like jamesrandism (atheist awtokism), rad-tradismo (catholic / christian awtokism) and even typhonism (awtokism of godkins against godkins).

In order to fight awtokism, we mythics need to come together and try to study more about awtokism on our own, in order to understand what awtokism is about and be able to fight before the persecution against mythics (us) starts for real even so, why not inform about awtokism to your mythical friends and to all the mythics you know and we are going to fight awtokism and all its aspects.
